Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application has been reviewed. Claims 1, 4, 5-23 and 37-50 are pending.
The rejection(s) are as follows.

Response to Arguments

1. Applicant's arguments with respect to claims 1, 4, 5-23 and 37-50 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 19, 37 and 45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1, 37 and 45 disclose the term 'without advertiser intervention', with regard to adjusting the respective bid amounts. Claim 19 discloses a similar statement to that of claim 19, 'search listings are re-ordered without advertiser intervention'. The Applicant lists page 5, line 28 to page 6, line 2 of the specification. The specific statement of relevance in this section would be, "the relevance of a bidded search term in a search listing to the corresponding web site

may be evaluated using a computer program executing at the processor of account management server, where the computer program will evaluate the search term and corresponding web site according to a set of predefined editorial rules. The Applicant further notes that page 12 of the specification discusses reordering the search listings without advertiser intervention, the Examiner disagrees. As shown about, pages 5-6 discuss examining the relevancy of the search listing and page 12 discloses adding the value of one cent if a tie condition remains (based on the bid amount). In these instances, there is no mention of re-ordering the search listings.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claim 44 is rejected under 35 U.S.C. 103(a) as being unpatentable over Buck et al. (US 6,078,866) in view of Ausubel (Us 6,026,383), hereafter referred to as Buck and Ausubel respectively.

7. Regarding claim 44, Buck discloses:

- a. A database for storing search listings in figure 5 (elements 20, 30 and 40)
- b. Advertisers, or website owners in column 3 (lines 53-65)
- c. Respective bid amount, or dominated value in the Abstract
- d. Keyword search listings, or title/description in the Abstract, and also referred to as index/Boolean search in column 1 (lines 44-65)
- e. An advertiser access page in figure 2B
- f. Updating search listings in figure 2B (element 47)
- g. An area to receive search query terms in figure 4A (element 1a)
- h. A search result list in figure 1A

8. While Buck does disclose that a web site owner can determine the ranking of a website in column 4 (lines 13-29), Buck does not specifically disclose that the use of this ranking method with a tie condition. Ausubel discloses using a deterministic method for breaking ties. Therefore, it would have been obvious to use a known method (incrementing the bid) to increase the bid amount to break a tie.
